About Two Rivers

Mission

To nurture a diverse group of students to become lifelong, active participants in their own education, develop a sense of self and community, and become responsible and compassionate members of society.

The mission is supported by the following goal: when students graduate from Two Rivers, they will have the cognitive and social skills to succeed in high school and college so that they are positioned to have rich and varied options for their future.

Curriculum and Instruction

Two Rivers Public Charter School is an educational environment where students and staff are a community of learners on a journey of discovery. Founded by an energetic and committed group of DC parents, Two Rivers uses EL Education, formerly Expeditionary Learning, a model of education that emphasizes interactive, hands-on, project-based learning. The school focuses on the whole child, recognizing the importance of character education and the social-emotional needs of children while helping them achieve academic excellence.

The Two Rivers community shares a strong belief that all children can learn and be high achievers. The curriculum at Two Rivers is rigorous, standards-based, and provides opportunities for students to excel in all areas. An integrated arts program and a content-based Spanish program augment the school's demanding academic program. These elements come together through learning expeditions that allow students to incorporate and apply their classroom learning through real-world experiences.

Two Rivers' curriculum encompasses many areas of study and utilizes the Common Core Standards to guide student learning. All students participate in language arts, math, social studies, science, Spanish, physical education, drama, art, and music as part of their regular program. Two Rivers' curriculum framework outlines essential areas of study in science and social studies covered at each grade level. Included topics provide an interdisciplinary framework upon which all children can build their knowledge year after year, ensuring that by the time a student graduates from eighth grade, he or she will have studied critical aspects of each discipline: physical science,

life science, and earth science in the sciences, and geography, civics, history, and economics in social studies.

Two Rivers uses a balanced literacy approach to teaching reading, both through the use of authentic, compelling pieces of literature and informational text and through direct instruction in fluency and decoding skills. At upper grades, students focus on in-depth reading comprehension through complex text sets in literacy units and expeditions. Two Rivers' literacy program also includes direct instruction in the mechanics of reading, reading comprehension strategies, vocabulary development, and writing.

Math instruction at Two Rivers guides students to develop a comprehensive understanding of mathematical concepts, encompassing everything from a strong sense of numbers to conceptual understanding of shapes in space. Two Rivers uses Bridges Math and Number Corner from the Math Learning Center in the elementary grades and Carnegie Learning in the middle school. The emphasis in these programs is not to teach specific algorithms to solve problems, but rather to guide students through a process of exploration around mathematical ideas and to introduce them to multiple methods of solving problems. Through this approach, students develop a greater level of understanding of the mathematical concepts and thus fully comprehend not only how to do an efficient algorithm but understand why it works. In addition to building students' conceptual understanding of math, Two Rivers also works to develop students' efficiency with numbers and computation. Through regular focused time to increase speed and proficiency, students are better

able to access the rudimentary mathematical skills they need to further deepen their understanding and apply mathematics to relevant situations. Two Rivers' math program is designed to develop proficiency in mathematics so that all students are well prepared to succeed in high school. With that in mind, Two Rivers offers credit-bearing algebra and geometry courses for middle school students who have demonstrated that they are prepared for work in more advanced mathematics.

Learning expeditions, a component of EL Education, are the main instructional vehicle for social studies and science learning. EL Education is based upon the tenet that studying something in depth will help students develop lifelong learning skills more successfully than studying a broad range of topics in less detail. While teachers at Two Rivers aim to cover the standards for each child in a grade, two areas of study are explored in much greater depth each year. These topics are selected from the curriculum framework. All units of study involve intensive research, reading, writing, scientific exploration, and real-world application. Two Rivers' curricular programs are aligned with the school's mission, instructional, and character development programs.

To realize the mission, Two Rivers believes that students need more than the core content and basic skills of a traditional school curriculum. Students need to develop skills associated with critical thinking, problem-solving, collaboration, communication, and character; or what are collectively called 'deeper learning skills.' Two Rivers is committed to cultivating the important deeper learning skills that all students need to have rich and varied options for their future. These skills enable students to solve any type of complex problem they may encounter.

The skills of critical thinking and problem-solving require mastery of core components:

Decision-Making

The ability to think critically about what one is doing and evaluate many potential choices

Effective Reasoning

The ability to create claims and support them with logical evidence

Problem Solving

The ability to identify the key questions in a problem, develop possible paths to a solution, and follow through with a solution

In addition, Two Rivers believes that students can build character skills that will aid them in accessing deeper learning. Character are the intrapersonal skills necessary for success. Character involves being able to monitor and direct one's own learning, as well as cultivating positive attitudes and beliefs about one's academic abilities and identity as a learner.

It also involves the skills of setting goals, maintaining attention to detail and precision, and cultivating a growth mindset. Additionally, character involves personal integrity in both work and relationships. Thinking about character in these ways values how individuals think about themselves both as learners and more broadly as people.

Collaboration and communication are interpersonal skills that help people work well with one another. Both collaboration and communication involve being able to read the vast number of verbal and nonverbal cues that we all use to communicate our ideas and emotions. People need to learn to build shared understanding, negotiate outcomes, and cultivate trust to work together to solve the problems that no one can solve alone.

To help students understand and define character, Two Rivers developed five "scholarly habits," which are shared with students, discussed frequently, and create a shared language for these sometimes hard-to-define traits. Two of the five habits speak directly to habits of character while one scholarly habit crosses between character and collaboration and communication skills.

I know myself: This scholarly habit is aligned with the Collaborative for Academic, Social, and Emotional Learning (CASEL)'s competency for self awareness, which is defined as the ability to accurately recognize one's emotions, thoughts, and values and how they influence behavior; as well as the ability to accurately assess one's strengths and limitations, with a well-grounded sense of confidence, optimism, and a growth mindset.

I am independent and resilient: This scholarly habit is aligned with CASEL's competency for self-management. They define self-management as the ability to successfully regulate one's emotions, thoughts, and behaviors in different situations — effectively managing stress, controlling impulses, and motivating oneself. In addition, effective self-management requires the ability to set and work toward personal and academic goals.

I act with integrity: This scholarly habit combines character and collaboration and communication and is aligned with CASEL's competency of responsible decision making. It is defined as the ability to make constructive choices about personal behavior and social interactions based on ethical standard, safety concerns, and social norms. In addition, to act with integrity people must realistically evaluate various consequences of actions with consideration of the wellbeing of themselves and others.

I show compassion and embrace diversity: This scholarly habit is aligned with CASEL's competency for social awareness. They define social awareness as the ability to take the perspective of and empathize with others, including those from diverse backgrounds and cultures. In addition, showing compassion and embracing diversity includes the ability to understand social and ethical norms for behavior and to recognize family, school, and community resources and supports.

I can connect and collaborate: This scholarly habit is defined by CASEL's competency for relationship skills. They describe relationship skills as the ability to establish and maintain healthy and rewarding relationships with diverse individuals and groups. Strong relationship skills also involve the ability to communicate clearly, listen well, cooperate with others, resist inappropriate social pressure, negotiate conflict constructively, and seek and offer help when needed.

Parent Involvement

Two Rivers' parents, guardians, and staff collaborate using a formal parent involvement structure- the Two Rivers Parent School Association (PSA).

The purpose of the PSA is to support the education of children at Two Rivers Public Charter School network, which includes three Schools: 4th Street Elementary, Young Elementary, and the Middle School by fostering positive relationships among the school's administration, faculty, trustees, and parents.

The association's primary goals are:

- 1) School-wide community building; and
- 2) Ensure families are key partners in the education of thier children to actively engage them in the life of the school community.

All parents and guardians of Two Rivers students, as well as Two Rivers staff and administrators, are automatically members of the PSA, have voting rights, and can hold PSA offices.

In the 2021-22 school year, the Two Rivers PSA embarked on a thoughtful and monumental restructuring initiative. The restructuring was done as a reevaluation of previous practices and operation, thoughtful and reflective focus on the unique needs of parents post-covid, and a commitment to increased inclusion and diversity.

After a meticulous restructuring of the bylaws and governing process, the PSA was able to effectively launch PSA chapters with President and Secretary representation for each Two Rivers campus. Along with the task of restructuring itself, the PSA was able to launch room parent representation, which made a tremendous impact in classroom support and parent culture. PSA chapters were also able to begin hosting pop-up and connection events at the latter part of the year. The most impactful work of the PSA was the lending of parent voice to important school-wide decisions and process, deeply planning with school based teams, and providing thoughtful reflection for the planning of PSA in the 2022 -2023 school term.

In addition to being involved through a formal parent school association, Two Rivers family members are engaged in their children's learning through family conferences, celebrations of learning, and educational nights. In the middle school, 3 6th grade crews had 100% family participation in showcase! At our 4th Street campus we had at least 95% family participation in showcase across grades PS-5G.

Performance and Progress

The Mission in Action

Now in its 18th year, Two Rivers has remained committed to its mission to nurture a diverse group of students to become lifelong, active participants in their own education, develop a sense of self and community, and become responsible and compassionate members of society.

Two Rivers recognizes that in addition to the core content and basic skills that schools have traditionally taught, students need more in order to be successful. Students need to develop skills associated with critical thinking & problem-solving, collaboration & communication, and character. Two Rivers continues to achieve its mission by creating a nurturing community, developing life-long learners, and ensuring that students are equipped with the tools and skills they will need to be self-advocates throughout their lives.

To nurture students, Two Rivers' founders recognized the importance of creating an environment where all families and students felt welcome and supported. On the 2019 Comprehensive School Climate Inventory, Two Rivers continued to receive high ratings (greater than 3.8 of 5 possible points) from students and families on indicators related to their physical surroundings, respect for diversity, rules and norms, the support of adults and students, and support for learning.

Central to our mission is the importance of developing in students a love of learning for its own sake. Two Rivers believes that important learning and development take place when children challenge one another, ask questions, and work collaboratively in order to build on one another's knowledge. To that end, students at Two Rivers are challenged to use their critical thinking and communication skills through participation in problem-based tasks throughout the year. Problem-based tasks are at the heart of expeditions, acting as rich, compelling tasks that drive students to think critically and creatively to develop a collective response or solution. At the end of each semester, students unveil the products of their expedition in the form of vibrant, high-quality work for parents and community members at Showcases of Student Learning, events that are regularly attended by more than 90% of Two Rivers families.

Another way that students share their learning in the middle school is through student-led conferences and portfolio assessments. First launched during the 2011-12 school year, student portfolio assessments continue to be an important component of the Two Rivers middle school experience and are a compelling example of the mission in action. Students in grades 6 through 8 present a portfolio of high-quality work to their parents

and guardians twice a year. Students in grades 4 and 5 also create portfolios to share with their families. Students present three to five pieces of work, and explain the skills, knowledge, and processes necessary to complete the work.

Seventh graders participate in a Passage Portfolio which elevates the stakes for the transition from 7th grade to 8th grade. Students present their work to a panel of Two Rivers staff who then ask probing questions and inspire students to discuss their strengths, areas that need development, and growth over time through revision. Students must pass the Passage Portfolio before they are promoted. This process asks students to meet intentionally-set high expectations. If students fail within this structure, they are afforded multiple opportunities to learn and grow.

Goals and Academic Achievement

Students' performance on academic assessments are a part of the Two Rivers mission, and Two Rivers continues to outperform the charter average, and the state average in ELA and Math on the Partnership for Assessment of Readiness for College and Careers (PARCC). Additionally, Two Rivers Young Elementary campus experienced an increase in student proficiency in ELA and math, bucking the District trend of declining reading and math performance as a result of the pandemic. While this is an achievement worth celebrating, Two Rivers recognizes that there is still much work to do to eradicate the persistent achievement gap which remains.

In addition to adopting the Performance Management Framework (PMF) as Two Rivers' goals and academic achievement expectations, Two Rivers has adopted the following goal: on the EL Education Review, each Two Rivers campus will meet or exceed its yearly target score. This review ensures that Two Rivers is implementing its model with fidelity and achieving core components of its mission: students actively engaged in learning that matters.

Due to the pandemic and subsequent recovery last year, Two Rivers was unable to conduct a full implementation review across all of our campuses. In the 2022-23 school year, we will partner with EL Education to conduct full reviews at each of our campuses in order to assess progress on our program implementation as well as to prepare our Young Elementary and Middle School campuses for the credentialing process.

Unique Accomplishments

Spotlight on Early Learning

On November 5th, 2021, the Voice of America TV channel aired a story on early childhood learning at Two Rivers. The piece featured two master teachers, Ms. Helen Gasperetti and Ms. Sherrie Nesbitt. The reporter initially heard about Two Rivers in a DCist article on skillful reopening of schools which ran in September 2021.

Fund for Teachers Grant Recipient

Middle School Social Studies Teacher, Zo Clement, was the recipient of Fund for Teachers Grant to conduct interviews and research within local indigenous community to draw connections between indigenous local governance/culture and restorative justice practices. They will also use the time to build our curriculum to center Indigenous voices.

Fulbright-Hays Seminars Abroad Award

Young ES Special Education Teacher, Kate Cooper, was the recipient of a Fulbright-Hays Seminars Abroad Award to visit the Philippines to grow an understanding of their educational system, sustainable development, business, the economy, and foreign relations.

Acceptance into Society of Science Advocate

Middle School Science Teacher, Allyse Hellmich, was accepted as a Society of Science Advocate, and will be receiving training on how to mentor young people to enter science competitions.

6G Stem Fair

This year Ms. Allyse held our first ever 6G STEM Fair where she guided every 6th grader in her cohort through an individualized project, specifically tailored to their interests. Two students created a circuit that could detect fruit and vegetable ripeness to reduce food waste. Another student studied the psychology of Rock, Paper, Scissors and determined, using a ton of data, what the optimum order was for winning! Each of the students worked extremely hard on their projects.

Alumni Spotlight - TRConnect (9G Academy)

TRConnect is one mechanism to boost equity after students leave Two Rivers. Although there continues to be a gap in academic performance, there has been a steady increase in the percentage of Black and Brown students achieving a GPA of 3.0 or higher. Based on our mid year review of all students we have data on, 76% of our students have been able to meet the goal of a 3.0 or higher in both math and English. In addition, it appears that 73% of the African American students and 100% of our Latino students in this data set have reached the goal of a 3.0 or higher in both math and English during the first semester of their freshman year.

Special Education Student Math Growth

For the 21-22 school year, teachers were provided Professional Development and support around increasing access to grade level math instruction and giving "just in time" supports via our curricular tools, Bridges and Zearn. The percentage of special education students meeting their Growth Goals in MAP increased from 12% in the fall to 55% in the spring.

Bringing Back Showcase In Person

At the end of the 21-22 school year, we brought expedition showcases back in person and invited families to celebrate student learning in our 3 school buildings. Across our one continuous journey, parents took a tour of the gardens that their young preschool gardeners grew with soil, sunlight, water, and love, while 8th graders presented their narrative speeches advocating for a more democratic middle school, inspired by past and present case studies of injustice in our country. First graders revised and presented their 3-D spider habitat dioramas with scientifically accurate spider models, while 7th graders recited original resistance poems that had gone through multiple rounds of critique to ensure relevant historical content and powerful use of figurative language. In the middle school, three 6th grade crews had 100% family participation in showcase! At our 4th Street campus we had at least 95% family participation in showcase across grades PS-5G.

8G Algebra Credit

69% of Algebra students earned a High School Algebra 1 Credit! This represents the highest percentage of 8G students leaving Two Rivers with this credit!

Unique Accomplishments

North Wing & Health Suite Expansion at Two Rivers Young

In February 2022, Two Rivers' completed construction at Two Rivers Young Elementary School resulting in the addition of 2 classrooms and expanded health suite. The new health suite allows us to support Young Elementary students and middle school students.

Field Studies with Expedition Experts

During semester 2, field experts were welcomed back into the building to share content knowledge around student's expeditions. Visitors ranged from bug experts to social activists. Students were able to grapple with hands on experiences alongside field experts for the first time since March 2020.

Assistant Teacher Professional Development

For the 21-22 school year, we piloted assistant teachers planning and delivering math fluency and skill instruction through our Number Corner curriculum. Assistant teachers received a series of PD sessions including The Purpose and Plan for Number Corner, Facilitating for Pacing and Student Engagement, and Observation Feedback.

Passing of the Torch

Two Rivers 4th Street Elementary Upper School students participated in two Passing of the Torch events. 6th grade students met virtually with 5th grade students to share words of wisdom, suggestions for being successful in middle school, and encouragement for finishing their last year in elementary school. 5th grade students hosted a Passing of the Torch event in the Upper School Gym in which 4th grade students and their families were invited to attend. Each 5th grade student crafted a personalized letter addressed to a 4th grade peer with wisdom learned as the oldest students in the elementary school. Emily Degani, a 21-22 school year 4th grader, was chosen as the crew representative to deliver a speech which outline successes and triumphs throughout the school year.

In Person 5G Promotion Ceremony

Two Rivers Young Elementary restored the tradition of in-person 5th grade promotion ceremonies. To strengthen family relationships and foster a greater sense of community. 100% of the students and families attended to celebrate the accomplishments of the 5th grade students! Additionally, middle school students gave speeches to provide wisdom on the transition from 5th grade to middle school.

Diverse Charter School Coalition Member of the Year

Two Rivers Public Charter School was named the Diverse Charter School Coalitions Member of the Year by fellow members at their annual covening recognizing our unique contributions to the diverse by design charter school movement.

In Person Gala

For the first time in two years we were able to host our first in person gala with over 200 families and community members present. We maintained our relationship with EDENs at Dock 5 and were able to keep secure the space for free as in past years. The TR community was able to gather together and celebrate and raise over \$100k.

Flag Football

Two Rivers Middles School PE Teacher, Coach Terrell started Flag Football as a club, but due to such a great turnout, the club was converted into two competitive teams. Both teams finished their seasons by winning the FlagStar Flag Football Championship!

PSA Educator Series

PSA members collaborated with the 4th Street Principal to bring a 3 part educator series to the 4th Street Community, including Principal leadership story, parents open mic, and what sets Two Rivers Apart.

Remote Instruction

In response to the pandemic, we were able to partner with iTutor to launch remote instruction for our medically exempt students. Additionally, we were able to use this platform to ensure that any student who had to quarantine for COVID was able to access instruction remotely.

Unique Accomplishments

Alumni Spotlight - TRConnect

Two Rivers Alumni showed up in every way, from our college graduates who have finished from schools like Drexel University/Knox College/Salisbury University/Lincoln University/William & Mary/Howard University, and so many more, to our high school students who have graduated from some of the top high schools in the city like School without Walls, McKinley Tech, Duke Ellington and are going to colleges and universities like University of Wisconsin (as POSSE scholars), George Mason University, Morehouse College, Trinity Washington and so many more. In addition, we had at least two high school age students nominated for a Cappi Award for their role/part in the play Twelve Angry Jurors. Two Rivers Alumni have grown into the people they are designed to be and making their way and a name for themselves in the process.

Student Ambassadors Welcome Visitors into 4th Street Elementary

4th and 5th grade student ambassadors welcomed visitors back into the 4th Street campus for the first time since March 2020. As members of the student ambassador program they learned to provide high quality tours which include speaking and listening skills, historical knowledge about our community, and the ability to answer questions on a range of topics.

Student ambassadors provided community tours to 20 visitors from Teach for America Detroit, 5 visitors from Dr. Christine Grant's State Superintendent of Education team, and over 20 incoming preschool families.

Rooftop Playground at Two Rivers 4th Street Upper School

In April 2022, Two Rivers completed the renovation of the upper school rooftop to a student designed playground. The new playground features an active zone with basketball hoop and climbing wall and a quiet meeting zone offering multi-purpose benches for seating and performances. Working with Studio 27, students in grades 1-4 participated in focus groups to lend their input in the space design.

Two Rivers Assessments of Critical Thinking Shortlisted as Most Promising Innovations in Formative Assessment by the HundrED

Two Rivers Assessments of Critical Thinking were shortlisted by the HundrED organization in Finland as one of the most promising innovations in formative assessment. This recognizes our work to develop classroom based solutions to defining, teaching, and assessing critical thinking and problem solving skills.

Grades 3-8 Common Lit Assessment Year 1 Growth

The 21-22 school year was the first year that students in grades 3-8 took the Common Lit ELA assessment, a rigorous assessment that measures performance on ELA literary and informational text standards 3 times a year. Teachers in grades 3-8 used their student data from the first 2 assessments to determine priority reading and writing targets to focus on in read-talk-write instruction within expeditions. Across grades 3-8, we made an average gain of +7 points in scaled score from the beginning of year assessment to the end of year assessment. The scaled score is derived from both the number of questions that students answer correctly and the difficulty of the questions. This increase on average scaled score surpasses the average of +4-5 points that is typical on Common Lit.

Whole School Community Meetings

In response to greater restrictions for social distancing, we designed and led virtual whole school community meetings for the entire school year! Student crews took on the responsibilities of planning and hosting virtual weekly community meetings. This opportunity allowed students to live out our school's mission of nurturing a diverse group of students to become active participants in their own education while developing a sense of self and community.

Physical Education Department

The Two Rivers Physical Education Department is made up of a solid team of physical education teachers including, Coach Tarik, Coach Delonte, Coach Tianté, Coach Antwan, and Coach Terrell. For the 21-22 school year the department has hosted successful events such as the Fall Festival, the Dance Competition, and Field Day.

Unique Accomplishments

Arts Showcase

For this year's middle school showcase, students showcased art pieces inspired by various arts in different styles. Artist inspirations included Jean-Michel Basquiat, Paul Kee, Andy Warhol, and Pablo Picasso. In addition, students were able to create music in the music room studio! Special shoutout to Ms. J'Lyn, Ms. MyShia, and Mr. Stradivari for spearheading the showcase.

PSA Pops Up

4th Street Elementary reinstated our Parent Student Association (PSA), which serves as our family voice for our campus. Elected PSA members include Anya Stockburger and Cara Duvall, who successfully planned and hosted 2 family pop ups to bring in person connections back during the 21-22 school year.

First Year of NYU Partnerships

The 21-22 school year was Two Rivers' first year of NYU Partnerships. We are proud to announce that both residents remained on as lead teachers for the 22-23 school year!

Supporting Neighbor in Need Through Ongoing Campaign fundraising

During the Holidays from October- January, the parent and donor community helped to raise over \$80k towards our Beyond the Basics Campaign. The money raised was used to support Two Rivers families experiencing financial hardship and provided additional funds which allowed Two Rivers to continue going Beyond the Basics.

Recognized by the Canopy Project

Two Rivers 4th Street campus was recognized by the Canopy Project as one of the most innovative schools in the country.
